A LETTER FROM MR. DAVE

Summer is one of my favorite times of the year due to many years of experience in creating award-winning, exceptional-level quality

summer camp programming. It's also the perfect time to truly showcase my new Create Joy curriculum in a major way.

How do you create joy? That is exactly what I do every day with every project and every lesson. It has more than one meaning.

There is joy in:

- Creating art and learning new things about the world and how it works through exciting scientific adventures.
- Using art to learn numbers and computational skills.
- Watching your children learn Spanish as a second language.
- Knowing that your child's potential is being explored and expanded far beyond the usual expectations for preschool aged children.

We have already rolled out my Create Joy program as a curriculum supplement during the school year, but for summer, we are taking it to a new level.

Each age group will have age and developmentally appropriate activities. From professional artist level art instruction, to chemical reactions and physics wonders, to building robots and other scientific devices, to creating our own movie studio quality props and making a short science fiction film, 2022 is going to be one seriously amazing summer.

If you want to see what true joy looks like every day, enroll your child or children in ERCDC's Camp Create Joy today. We can't wait to watch the joy unfold!

See you for summer!

Mr. David Rossi

Child Development & Curriculum Specialist
